

Secure. High-performance. Flexible. The customised Global Payment Outsourcing System.

The requirements of payment transactions in global trade are constantly increasing. And so are also the expectations of service providers and financial institutes. The solution for a high-performance and effective online handling of all payment processes goes by the name of PaySourcing™. The e-platform makes it possible for you to entirely outsource payment and risk management systems. We provide the technology – you do the business.

Benefit from our guarantee assurances too:

- Our service to you – the provision of the applications via the Internet. Software as a Service (SaaS)!
- We only serve suppliers of payment and financial services. We support your services!
- All our white label services are incorporated into your services in your corporate design. We strengthen your brand!
- Simple integration into all current ERP systems. We round off the range of services that you offer!

The benefits of PaySourcing™:

- Complete outsourcing of payment and risk management systems
- Connection of all payment methods and systems worldwide
- Full control: you manage and analyse all payments
- White label services: all services in your name and design
- SaaS*: all benefits of a rental solution (best of breed)
- Cost control through invoicing per transaction
- Complete automation of all processes
- Graphically and flexibly adjustable payment page; can be integrated into any shop system
- PCI-certified and maximum security standards
- Guaranteeable availability of more than 99.9 %
- Business intelligence: comprehensive and easily interpreted reporting

* Software as a Service

PaySourcing™. Modular system with vision.

PaySourcing™ is a modular system that supports a large variety of applications and facilitates the optimum handling of payment processes. The consistent further development of the individual modules gives PaySourcing™ and its users a constant technological head start.

Payment outsourcing

PaySourcing™. We provide the technology, you do the business.

PaySourcing™ is the platform with which you can reliably outsource all your online payment and risk management systems worldwide. And do so for all payment methods and currencies worldwide.

Payment processing

- Connection of all providers, processors and financial institutes worldwide
- Support in any currency
- Simple integration into all current ERP systems
- Global handling of all payment methods:
 - Bank and online transfers
 - Direct debits
 - Credit and debit cards
 - Pre-paid cards
 - E-wallets and micro-payments
 - Mobile payments

Risk management

- Individually adaptable averting of fraud
- Rating of the data transferred in real time
- More than 100 different test processes, e.g.
 - Comprehensive negative lists
 - Individual rating systems ('scoring')
 - End customer authentication via e-mail, SMS or 3-D Secure™
 - Integration of external service providers

Professional services

- White label services:
 - Integration of all activities and services in your products
 - Presentation in your corporate design – to strengthen your brand
- Comprehensive consulting and support services
- Know-how transfer through regular training courses
- Provision of a demo shop for the sales support of our customers
- e-Terminal™, a call centre solution to support MOTO payment processes

Software as a Service – SaaS.
